

What is TurtleMatrix?

ICanProve.IT

*Tracking, tracing, telematics for all your vehicles—
simple, effective and reliable*

The name comes from **Turtel** (our Group name) and Matrix—for a grid or organisational structure.

Many customers appreciate the option to 'white-label' TurtleMatrix, so tracking/telematics becomes part of their offering to their customers.

Gravin Urtel, ICanProve.IT

Why choose TurtleMatrix from ICanProve.IT?

If your business relies on vehicles, whether transport is your main business or just a tool in your armoury, then you need to know where those vehicles are and prove where they've been.

TurtleMatrix is simple to use, quick to implement, and integrates seamlessly into your management tools. It is reliable, scalable and can, if wanted, be white-labelled to carry your own branding.

Key features

1. An **affordable monthly subscription** means that you can scale this solution quickly up and down to rapidly accommodate changes in fleet size.
2. Our **simple online portal** can be accessed via a browser. **Map-based tracking, colour-coded pins, vehicle speed & behaviour** are easy to see and understand.
3. Updates and service activation is via **remote management**, without the need to visit vehicles. Flexible add-ons and plug-ins integrate seamlessly, eg on-board video.

What can you expect to gain?

- Improved efficiency and control
- The ability to find your closest vehicles
- Visualisation of fleet location and behaviour
- Affordability—low-cost monthly subscription
- Increased flexibility and agility
