

What is VIDEMUS?

ICanProve.IT

Videmus is a Latin word that translates as '**I see and observe**'.

It is the name we chose for our camera systems, perfect for any company wanting to connect visually with vehicles, or other remote assets.

"With **Videmus** from ICanProve.IT, we know what has happened, can prove what has happened, close the claim and move on."

Peter Kelly, Elis

Why choose Videmus from ICanProve.IT?

If you need to see what is really happening to any of your vehicles on the road; if you have been the victim of fraud; if you want to protect your drivers: then the case for fitting cameras is clear.

Videmus cameras are top-quality, rugged, discrete & tamper-proof. Wide-angle/ fish-eye lenses allow full 360° visibility. Best of all, our lenses are cloud-connected for secure, single-click, remote access.

Key features

1. Our **high-quality Axis lenses** frequently outlast the vehicles in which they're fitted. Wide-angle views capture more of the action—with **no blind spots**.
2. All cameras are **linked to the cloud**, to enable you to view footage from any lens, any time, anywhere, on any device with an internet connection.
3. **Digital fingerprints**, tamper-proof fitting, 5-yr secure cloud storage, and 28 days on-board give you confidence in having the footage you need when you need it.

What can you expect to gain?

- Faster, more efficient resolution of claims
- Fewer contested claims, fraud eliminated
- Significant savings on insurance, investigations and claims
- Health & safety procedural reinforcement and support
- Drivers who know you 'have their back'
